Summary

Versatile frontend developer with 4 years of experience building high-performance ReactJS web applications across healthcare, blockchain and fintech sectors.

Proven track record of reducing page load time by 20%, mentoring fresh graduates and integrating AI tools to streamline workflows.

Quick learner and innovative thinker passionate about creating seamless user experiences.

Working Experience

NetaLabs *April 2025 - Now*

Sotatek., JSC *February 2022 - March 2025*

- Developed and maintained responsive user interfaces for web applications using ReactJS and modern web development practices.
- Implemented reusable components and state management solutions to ensure efficient and scalable code.
- Collaborated with cross-functional teams to design and develop responsive web applications.
- Integrated front-end functionalities with backend APIs
- Reduced page load times by up to 20% through performance tuning techniques, improving overall user experience and application speed.
- Mentored 3+ fresh graduates, providing code reviews and technical guidance that led to a 15% increase in feature delivery speed within the team.
- Explored and implemented new tools and technologies to enhance development efficiency.
- Demonstrated experience in collaborating directly with US and Korean clients, ensuring effective communication and project delivery.

Projects

- **Supra IDE** - together with SUPRA

A sophisticated online Move language editor, specifically designed for developing and interacting with Supra blockchain smart contracts. The application provides a complete development environment similar to VSCode but specialized for Move language.

- Duration: 4 months
- Stack: React, Vite, Typescript, Chakra UI

- **Sentbe Backoffice**

A comprehensive backoffice solution designed for internal Sentbe teams to efficiently manage users, financial transactions, and multi-country operations from a single platform, resulting in improved operational efficiency and data management.

- Duration: 9 months
- Stack: Nextjs, Typescript, Shadcn, TailwindCSS

- **SmartKarte** - A Hospital Information System

A comprehensive platform for managing patient information, scheduling, and medical records, designed to streamline hospital operations and improve patient care.

- Duration: 1.5 year
- Stack: React, Typescript, MUI

- **BaseDict.com** - A Personal Project

A specialized platform for Vietnamese learners of Japanese, featuring interactive JLPT practice tests, translation and more.

- Duration: 3 months
- Stack: Nextjs, Typescript, Shadcn, Tailwind

And many other projects...

Skills

- **Frontend Development:** Expertise in modern web development with HTML5, CSS3, ReactJS, TypeScript, and NextJS, TailwindCSS, Shadcn, Antd, MUI,...
- **Backend Development:** Hands-on experience in developing scalable RESTful APIs with Node.js application and managing databases.
- **Tools & Technologies:** Git, Figma, Redux, Agentic AI, Agile/Scrum,...
- **Soft Skills:** Problem-solving, Critical thinking, Effective communication, Team collaboration
- **Languages:** English (Intermediate)

Education

Posts and Telecommunications Institute of Technology (PTIT)

Bachelor's degree in Information Technology
